

Antecedent: PTurnus(ne) & PTypPobytu(rekreační) & HStat(ČR)
 Succedent: DHodnoceni(spokojen) & DZabava(nižší)
 Condition: (empty)

TEXT | DATA | FREQUENCIES | 9-FOLD TABLE | FREQDIFF | PIE | BAYES

Vysvětlit tlačítka dole a výpočet charakteristik

*** Hypothesis ID: 140

Antecedent	Conjunction	
Pobyt	PTurnus	ne
	PTypPobytu	rekreační
Bydliště	Conjunction	
	HStat	ČR
Succedent	DHodnoceni	spokojen
	DZabava	nižší

Contingency table

	Succedent	NOT Succedent	
Antecedent	52	469	521
NOT Antecedent	47	1432	1479
	99	1901	2000

Quantifiers values:

BASE	52	52	a >= BASE ... at least BASE-number of objects for dependency to be statistically relevant
Above Average Dependence		1.02	1.0163244731 Among objects satisfying A, there is at least 100*p [%] more objects satisfying S than there are obje

Various interest measures from the four-fold table:

a	52	52	a-frequency from the contingency table
b	469	469	b-frequency from the contingency table
c	47	47	c-frequency from the contingency table
d	1432	1432	d-frequency from the contingency table
r	521	521	r-frequency (a+b) from the contingency table
n	2000	2000	n-frequency (a+b+c+d) from the contingency table
